SKILLS

Programming Language

Java, Python, Javascript, Dart

Infra & CI/CD

AWS, OCI, Docker, Github Action

Framework & Library

Spring, Flutter, React

Tools & DB

MySQL, Postgresql, Git, Codex

WORK EXPERIENCE

Kia

Backend Developer

August 2026 – Present

Yangjae, Seoul

- Waiting to work

Doosoun CNI

Software Engineer Intern

June 2025 – December 2025

Seongdong, Seoul

- Implemented backend services and business logic for ERP dashboard analytics and statistical reporting using Java, Spring Boot, and PostgreSQL.
- Developed and enhanced Windows-based ERP applications using C# and WinForms, contributing to the maintenance and expansion of existing enterprise systems.
- Created and maintained technical documentation, feature specifications, and user manuals to support ERP functionality and end-user operations.

Republic of Korea Air Force

C4I Network Operations Specialist

September 2021 – June 2023

Gyeryong

- Monitored and operated Air Force C4I wired network infrastructure to ensure stable network operations.
- Provided technical support and help desk services for Air Force C4I users, troubleshooting network and system-related issues.
- Maintained and enhanced an internal application for operational logging and shift handovers, improving information sharing between rotating support teams.

PROJECTS

Korean SQL Database

<http://hangeulite.everdu.com/>

- Designed a Korean-oriented SQL dialect that adapts SQL syntax to Korean language structure for improved readability and usability.
- Implemented a database system that parses, interprets, and executes the custom query language, including lexical analysis, parsing, and query execution.
- Analyzed the SQLite 1.0 source code and leveraged its architecture as a reference for implementing fundamental database engine components.

EDUCATION

Hongik University

BS, Computer Engineering

March 2020 – August 2026

Mapo, Seoul

- GPA 4.33 / 4.5 (Major 4.43 / 4.5)

ACTIVE CERTIFICATIONS

OPIC IM2

Engineer Information Processing
